

How can I secure my website statistics (awstats) with a login and password?

Artikelnummer: 1074 | Waardering: Nog geen waardering | Laatst bijgewerkt: Mon, Aug 7, 2017 10:16 AM

You are not able to secure the awstats statistics yourself but you can ask Telenet to do this for you.

Create a support ticket or send an e-mail to cloudsupport@telenetgroup.be containing the following information:

- your website's name
- desired login
- desired password

Our support team will handle this for you and send you an e-mail once this is executed.

When surfing to your statistics ([http://awstats.hostbasket.com/\[sitenaam\]](http://awstats.hostbasket.com/[sitenaam])) a window will pop up where you can introduce your login and password before viewing your statistics.
