

# How do I send mail from my website using PHP?

Article Number: 1285 | Rating: 3.7/5 from 3 votes | Last Updated: Wed, May 13, 2015 1:54 PM

You can send emails directly from your PHP website hosted on your shared Linux (Apache) package. Below you can find a sample code to do so. As “From” address you fill in an email address of your own domain name f.i. webmaster@your-domain.be.
