

Are Microsoft Access databases supported?

Artikelnummer: 2909 | Waardering: 3/5 van 1 stem(men) | Laatst bijgewerkt: Fri, Sep 20, 2013 2:08 PM

Yes, you can use one or more Microsoft Access databases in each IIS 8 webhosting package.

To do so, you should take following actions:

- Upload the database file (*.mdb or *.accdb) to your web space.

The simplest way is to use and FTP client.

- Create a “connection string” (your “connection string” contains all the required information to address your Access database).

This includes; connection method, location of the Microsoft Access database, username and your password.

- Here below you can find the different connection strings for you IIS 8 webhosting, depending on your Microsoft Access database version.

Microsoft Access 2003

```
Provider=Microsoft.Jet.OLEDB.4.0;Data Source=mydatabase.mdb;  
Jet OLEDB:Database Password=MyDbPassword;
```

Microsoft Access 2007

```
Provider=Microsoft.ACE.OLEDB.12.0;Data Source=myFoldermyAccessFile.accdb;  
Jet OLEDB:Database Password=MyDbPassword;
```

Microsoft Access 2010

Provider=Microsoft.ACE.OLEDB.12.0;Data Source=myFoldermyAccessFile.accdb;
Jet OLEDB:Database Password=MyDbPassword;
