

Which firewall configuration is available for my Dynamic Cloud?

Article Number: 2998 | Rating: Unrated | Last Updated: Mon, Aug 7, 2017 10:04 AM

Protect your server against unauthorized access from the internet. Determine what traffic is allowed. You can open and close the following ports yourself through the MyAccount online control panel (<https://mycloud.telenet.be>):

20 – FTP

21 – FTP

22 – SSH

25 – SMTP

53 – DNS

80 – HTTP

110 – POP3

443 – HTTPS

587 – SMTPS

993 – IMAPS

995 – POP3S

1433 – MS-SQL

2006 – SiteBuilder

3306 – MySQL

3389 – RDP

8080 – Tomcat

8443 – PLESK

Important:

- These ports can only be accessed by services that address these ports.
- Whenever you change the configuration, the entire firewall config is overwritten, clearing all manually added ports.
- Want to open other ports? Send an email to cloudsupport@telenetgroup.be or call us on 09 326 90 94 with your request. The ports will then be opened manually.
