

How to set the .NET Framework Trust level yourself

Artikelnummer: 3072 | Waardering: 5/5 van 1 stem(men) | Laatst bijgewerkt: Mon, Sep 12, 2016 3:39 PM

You can set the trust level yourself by making a change to the *web.config* configuration file for your web application(s);

this only applies to **IIS8** hosting packages.

```
<configuration>
  <system.web>
    <trust level="Full" />
  </system.web>
</configuration>
```

You can choose from the following policy names:

- Full
- High
- Medium
- Low
- Minimal
- Custom (= modified Medium trust policy)
