

# How to choose for a Shared Web Hosting solution?

Artikelnummer: 477 | Waardering: 4/5 van 1 stem(men) | Laatst bijgewerkt: Tue, Aug 1, 2017 2:21 PM  
Hostbasket offers you a solution that reflects your actual needs. We developed different packages based on different technologies. Below you will find how to make the right choice.

	<b>Windows</b>	<b>Linux</b>
<b>Programming languages</b>	PHP5, ASP, ASP.NET 4.0 (3.5 optional)	PHP5, PERL, PYTHON
<b>Databases</b>	MS SQL Server 2008/2012 database, MS Access	MySQL
<b>Web server technology</b>	(MySQL) IIS7 on Windows Server 2008	Apache on Ubuntu Linux
<b>Server Side Includes</b>	n/a	Included
<b>Packages</b>	<b>Starter</b> : for small, static websites	<b>Intro</b> : for PHP websites with a small database  <b>Advanced</b> : for PHP websites with a large database

You are still unable to make a choice? Then we can offer you [Hosting à la carte](#) and you determine yourself what you need.

View the website for more information on [Windows](#) and [Linux](#) hosting.

## What's next...?

You have outgrown Shared Hosting? Not all websites are suitable for Shared Hosting! Large number of visitors, very complex sites or sites requiring stricter security, these sites are often hosted on a [dedicated server](#) . Whenever you need to, you can switch from a Shared hosting solution to a Dedicated Server/Dynamic Cloud, thanks to the *Hostbasket Life Cycle hosting* concept.
