

## **I only see a list of files and not my website's homepage. What do I do?**

Artikelnummer: 591 | Waardering: 3/5 van 1 stem(men) | Laatst bijgewerkt: Fri, Sep 28, 2012 4:22 PM

This means your website does not contain a web page named **index.htm, index.html, index.php, index.asp, index.aspx, index.cfm**. A webserver recognises this page as the homepage of a website. In absence, it just shows a list of all your pages.

An alternative is **default.\*** with \* correct extension.

**Beware:** Linux is case-sensitive! So INDEX.html will not work.
